

## Excellent Training. Outstanding Results®

### CISM® Boot Camp

#### What is CISM?

The CISM or Certified Information Security Manager designation focuses on the management of information security. The CISM certification ensures that information security professionals, and specifically information security managers, have the experience and knowledge necessary to provide effective management and consulting services. CISM defines the core competencies and international performance standards that those who have information security management responsibilities are expected to master. CISM certification is a real career distinguisher oftentimes leading to salary increase and promotions

#### The ApZen® Advantage

ApZen is a leader in Information Security training. All our training professionals are CISM and/or CISSP certified, have information security management experience and excellent communication skills. Not only do we provide coverage of the exam contents, we reinforce these concepts through real world examples and practice questions.
